SSDB40 dataset was applied to the image segmentation experiment for structural scenes in the article:
 [Lin et al. 2015] I.-C. Lin, Y.-C. Lan, P.-W. Cheng, "SI-Cut: Structural Inconsistency Analysis for Image
 Foreground Extraction," IEEE Trans. Visualization and Computer Graphics, 21(7):860-872, July, 2015.

The sources of these 40 images were selected from the LabelMe webpage: <http://labelme.csail.mit.edu> .

The credits for the image sources go to the LabelMe database:

[Russel et al. 2008] B. Russell, A. Torralba, K. Murphy, W. T. Freeman, "LabelMe: a database and web-based
 tool for image annotation," Intl. J. Computer Vision, 77(1-3): pp 157-173, 2008.
